

The Precipitation Monitoring Program

The Waseca SWCD has been participating in a statewide precipitation monitoring programs since 1978. Rain gauges are provided to volunteers who submit monthly precipitation measurements to the SWCD. The data is then sent to the State Climatologist and is used to study and document precipitation and weather patterns for the State.

If you would like to volunteer to monitor precipitation amounts at your location in Waseca County, please contact the Waseca SWCD for more information.

Visit the State Climatology website for more weather information at: [Minnesota Department of Natural Resources State Climatology Office | Minnesota DNR](#)

University of Minnesota – Waseca SROC (Southern Research and Outreach Center) also has a website that covers local weather at: [Daily Weather | Southern Research and Outreach Center \(umn.edu\)](#)
